

**fmt\_val\_expr\_list :**

The diagram illustrates a list structure. A horizontal line with an arrow at its right end enters a large, rounded rectangle from the left. Inside this rectangle, on the left side, is a smaller, horizontally-oriented hexagon. This hexagon contains the text "<fmt\_val\_expression>". A line extends from the right side of the hexagon, continues horizontally, and then curves upwards and to the left, exiting the large rounded rectangle. This structure represents a linked list where the main container holds a pointer to a node, and the node contains the expression and a pointer to the next element.

`<fmt_val_expression>`
